

about your  
credit union

#### HOW IT WORKS

In the credit union you save with the other members, and borrow at low rates when necessary. Borrowers pay interest, thus providing income to pay operating costs and your dividends, and help your credit union give you more service.

#### WHY IT WORKS

You and the other members own the credit union. Only members can save and borrow. Service is good, and costs are low because most of your officials serve without pay.

#### HOW TO JOIN

If you're not a member, this is your invitation to join. Fill out an application card, pay the small membership fee, and start your share (savings) account.

#### USE YOUR CREDIT UNION

FORM CB-11

printed in USA

every day ... use this handy
